

# Powerboats

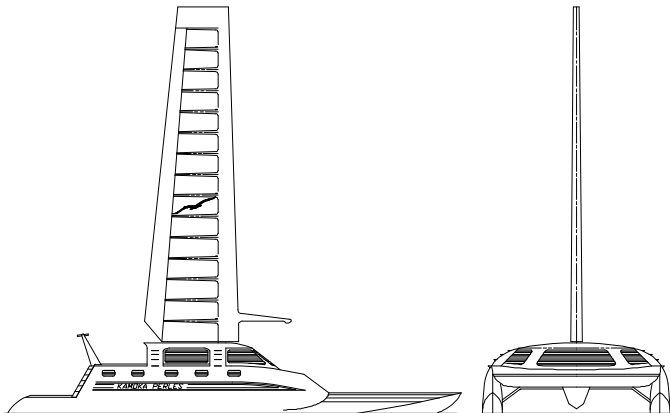

Our powerboat designs include everything from a 7.8m Jet Drive Runabout, various rigid bottom inflatables (including tunnel hulled versions), a unique *Rigid Wing Assisted 72' Commuter Cat*, and the elegantly styled "*Monte Fino 55*."

The *Commuter* is an 18 knot rigid wing sail power assisted catamaran for commuter runs between islands in Tahiti. Antrim Associates performed complete design and engineering for the wing and boat.

The *Monte Fino 55* is a production powerboat. A fast and luxurious Mediterranean styled cruiser for U.S. Yachts International. Many boats, including stretched versions up to 78' long, have been built to this hull design and are operating all over the world.
